Introduction to Semantic Services

AGENCE DES SYSTÈMES
D'INFORMATION
PARTAGÉS DE SANTÉ

January 26th, 2010

Once upon a time.....

Semantic Interoperability WP 3.5

Once upon a time.....

- **Semantic Interoperability** is the ability of communicating entities to share unambiguous meaning
- **The sender of the document** must be able to reliably transmit all sufficient and necessary information
- **The receiver of the document** must be able to correctly interpret its interlocutor
- Both must be **aware of, and agree upon**, each other behaviors for given interactions.

Once upon a time.....

- **Semantic Interoperability** needs to have the same
 - Concepts
 - Syntax
 - Terminology

Flashback – April 2009

- Data elements being defined by functional work packages (WP3.1 and WP3.2)
- Elements need to be coded as much as possible
- Keep contextual meaning
- Different code systems
- Looking for already existing and tested solutions present in the industry
- Solution tested
- =====
- Integration Statements (IHE) - 2 X Connectathon – proven solutions part of RFP – save time & costs
- (Semantic-tathon) - ?

Some...coded data elements

	A	B
1	Number	Coded element name
2	1	Patient Information
3	2	Patient Name
4	3	Family Name/Surname
5	4	Given Name
6	5	Gender
7	6	Birth Date
8	7	Patient Identifiers
9	8	Primary Patient Identifier
10	9	Regional/National Health Id
11	10	Secondary Patient Identifier
12	11	Social/Insurance Number
13	12	Patient Address
14	13	Street
15	14	Number of Street
16	15	City
17	16	Postal Code
18	17	State or Province
19	18	Country
20	19	Patient's Telecommunication
21	20	Telephone
22	21	E-mail

116	115	Duration of treatment
117	116	Date of onset of treatment
118	117	Date of end of treatment
119	118	Instructions to patient
120	119	Advise to the dispenser
121	120	Substitution
122	121	Patient Summary
123	122	Allergy
124	123	Allergy Description
125	124	Allergy description id code
126	125	Allergy Onset Date
127	126	Allergy Agent Description
128	127	Allergy Agent Code
129	128	Medical Alerts
130	129	Medical Alert Information (other alerts not included in allergies)
131	130	Health Care Alert description
132	131	Health Care Alert Code
133	132	History of past illness and disorders
134	133	Problem Description
135	134	Problem Code

178

• Tasks

- **T3.5.1:** Establishing a common definition of the medical knowledge to be used
- **T3.5.2:** Examine the existing terminology used
- **T3.5.3:** Determine a mechanism for managing terminology
- **T3.5.4:** Defining a common clinical data structure
- **T3.5.5:** Service specifications

9 MONTHS!!!

Results – January 2010

For Regulatory purposes,
we'd like to enter this as
"Data Element B"

Syntax = How the data is
structured (archetypes or
templates)

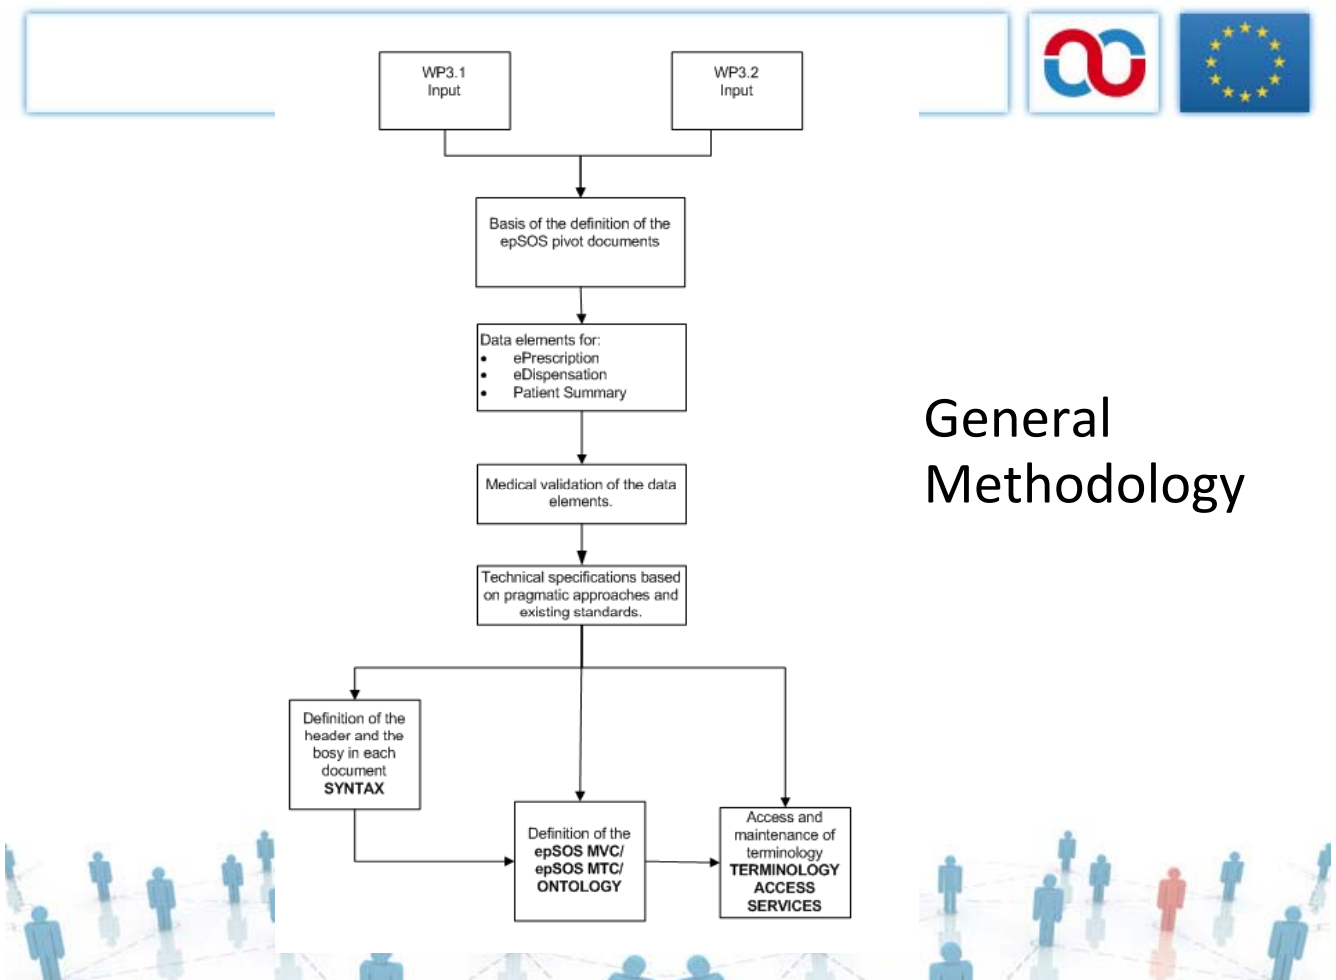

Terminology = How the data
is coded in different coding
systems (LOINC, SNOMED)

[Standards & Terminologies
